Overview

Introduction

The BRFSS is the largest continuously conducted telephone health survey in the world. It enables the Centers for Disease Control and Prevention (CDC), state health departments, and other health and education agencies to monitor risk behaviors related to chronic diseases, injuries and death. Therefore, it is an effective tool in preventing disease and promoting health. Since 1994, all states, the District of Columbia, and three territories have been participating in the BRFSS.

Methods and Content

People aged 18 and older are randomly called and asked to take part in the survey. They remain completely anonymous. Most states use the Disproportionate Stratified Sample (DSS) Method:

- Phone numbers are randomly selected throughout the state.
- Business and nonworking numbers are omitted.
- Individuals age 18 years and older are randomly selected from each household called.

In Virginia for 2002, surveying was continuous throughout each month of the year and 4,392 surveys were completed.

There are five sections in the BRFSS: Fixed Core, two Rotating Cores, Optional Modules, Emerging Core and State-added Questions. All states ask the Fixed Core questions every year. They include such topics as health status, health insurance, routine checkups, diabetes, smoking, pregnancy, women's health, HIV/AIDS and demographic characteristics.

The Rotating Core questions are asked every other year. In odd-numbered years, topics include: hypertension, injuries, alcohol use, vaccinations, colorectal cancer screening and cholesterol. In even-numbered years, rotating core topics include physical activity, fruit and vegetable consumption and weight control.

There are several Optional Modules that can be used in any state. Topics include: diabetes, sexual behavior, family planning, health care coverage, health care utilization, preventive counseling services, cardiovascular disease, arthritis, quality of life, hypertension awareness, cholesterol awareness, colorectal cancer screening, fruit and vegetable consumption, physical activity, weight control, folic acid, skin cancer, social context, tobacco use prevention, firearms, the effects of the World Trade Center bombings and oral health.

Emerging Core questions are those that can be added in any year to provide fairly rapid data about emerging health issues. Their duration in the BFRSS may be only several years – after which they might become part of the Fixed Core, disappear or become an Optional Module. For example, HIV/AIDS began as an Emerging Core topic and has since been added to the Fixed Core. Finally, states may add any additional questions they choose for their state survey.

In this report, each section begins with the actual question as asked on the survey. Following are tables with the answers to each question by total responses, gender, age, income, race and Hispanic origin. All questions are identified as to their type as defined above.

Demographic Characteristics of BRFSS Respondents in 2002

Following are frequency tables showing the demographic characteristics of BRFSS respondents.

Gender

	Frequency	Percent
Male	1797	40.9
Female	2595	59.1
Total	4392	100

Age group

	Frequency	Percent
Ages 18-24	331	7.5
Ages 25-34	703	16
Ages 35-44	952	21.7
Ages 45-54	960	21.9
Ages 55-64	641	14.6
Ages 65 and Older	805	18.3
Total	4392	100

Education

	Frequency	Percent	Valid Percent
Never Attended School or Only Kindergarten	6	0.1	0.1
Elementary (Grades 1-8)	192	4.4	4.4
Some High School (Grades 9-11)	362	8.2	8.3
High School Graduate (or GED)	1336	30.4	30.5
Some College or Technical School (1 to 3 Years)	1080	24.6	24.7
College Graduate (4 Years)	1392	31.7	31.8

Refused	11	0.3	0.3

Total	4392	100

Transportation Safety

Helmet Law

Some people have suggested that there should be a state law requiring that children under the age of 16 wear a helmet when riding a bicycle. If proposed, would you strongly favor such a law, somewhat favor it, somewhat oppose it, or strongly oppose? (This is a CIVP-added question.)

Total Responses

Car Seat Use by Children

Earlier you said there are children age 17 or younger living in your household. How often do your children aged 4 or younger use car seats when they ride in a motor vehicle? (This is a CIVP-added question.)

Seatbelt use by children

Earlier you said that there were children aged 17 or younger living in your household. How often do your children aged between 5 and 15 use seatbelts when they ride in a vehicle? (This is a CIVP-added question.)
