Another type of a stressful event that many men have experienced is unwanted sexual experiences. Men do not always report such experiences to the police or discuss them with family or friends. The person who did it isn't always a stranger, but can be a friend, girlfriend, boyfriend, or even a family member. Such experiences can occur anytime in a people's life-even as a child. You may find the next questions disturbing, but it is important we ask them this way, and we are using correct medical terms, so that everyone is clear about what we mean.

Again, I would like to remind you that any information you give will be kept confidential. Because these questions are sensitive, if you feel you might need to talk with someone after this interview, I will give you the hotline number **to a counselor - or would you like the number now?** (If the R would like the number now the telephone number is **1-800-838-8238**) Again, you do not have to answer any questions you don't want to. **May we continue.**
