Cancer Incidence Rate by Health District, Ovary, 2001-2005

Age-Adjusted Rate (per 100,000)

Source: Virginia Cancer Registry, Virginia Department of Health.
Rates are age-adjusted to the 2000 U.S. standard population.

Cancer Mortality Rate by Health District, Ovary, Virginia, 2002-2006

Age-Adjusted Rate (per 100,000)

- Rate not available
- 6.9 - 7.3
- 7.4 - 8.5
- 8.6 - 8.9
- 9.0 - 9.9
- 10.0 - 12.7

Source: Division of Health Statistics, Virginia Department of Health.
Rates are age-adjusted to the 2000 U.S. standard population.

Ovarian Cancer Statistics in Virginia - Notes

Sources: Incidence, percent local staging (VA Cancer Registry, 2001-2005), mortality (VA Center for Health Statistics, 2002-2006).

¹ Age-adjusted rates are reported and adjusted to the 2000 U.S. standard population. National rate comes from SEER (2001-2005) data. Districts are ranked in terms of incidence rates from highest (=1) to lowest (=35). Districts with low rankings (i.e., high incidence rates) are at greater risk.

² Percent of Local Stage cancers reported using the Summary Staging System. National average comes from SEER 2001-2005 data.

³ Mortality rate is age-adjusted using the 2000 Standard Population. National rate comes from SEER (2001-2005) data. Districts are ranked in terms of mortality rates from highest (=1) to lowest (=35). Districts with lower rankings (i.e., high mortality rates) are at greater risk.

~ Incidence rate and/or percentage diagnosed at local stage is not reported if less than 16 cases, and is not computed if count is less than 11 cases. Mortality rate not calculated due to having 25 or fewer cases.

⁴ Incidence rate for certain districts (e.g.,. Lenowisco, Cumberland Plateau, Lord Fairfax) may be low due to underreporting. Use caution when interpreting the rate.

Maps illustrate rates and percentages in quantiles.
